

**It needs your  
A-i-ENTION.**

The  
**Education  
Can't Wait**  
for hundreds of children in India.

It needs people to come together for  
**Shiksha Daan.**

This

give an underprivileged children  
a chance at a better future.

After all, **to live is  
to give!**

# The world is not okay.

Hunger

Climate Change

Unemployment

Poverty

As we face these today, we  
are also passing these  
problems on to our children,  
the next generation.

If we can't solve all the  
problems, then we must at  
least enable our children to  
be equipped for the future.

**Children need** education and a little bit more to become socially responsible citizens.

**Children of today need** continuous exposure to personal values & life skills.

**Children**, the decision makers, the trendsetters, the radicalists of tomorrow **will need** a positive mindset.

**Especially children from not-so privileged communities.**

**Our mission** is to be the unwavering support system for every child and their ecosystem that we work with, to help children grow into - a happy, independent and responsible contributing members of society.

**We believe, when we are able to do this for every child**

*We will be able to realise our vision of -*

**Future-proofing  
the next generation,  
today.**

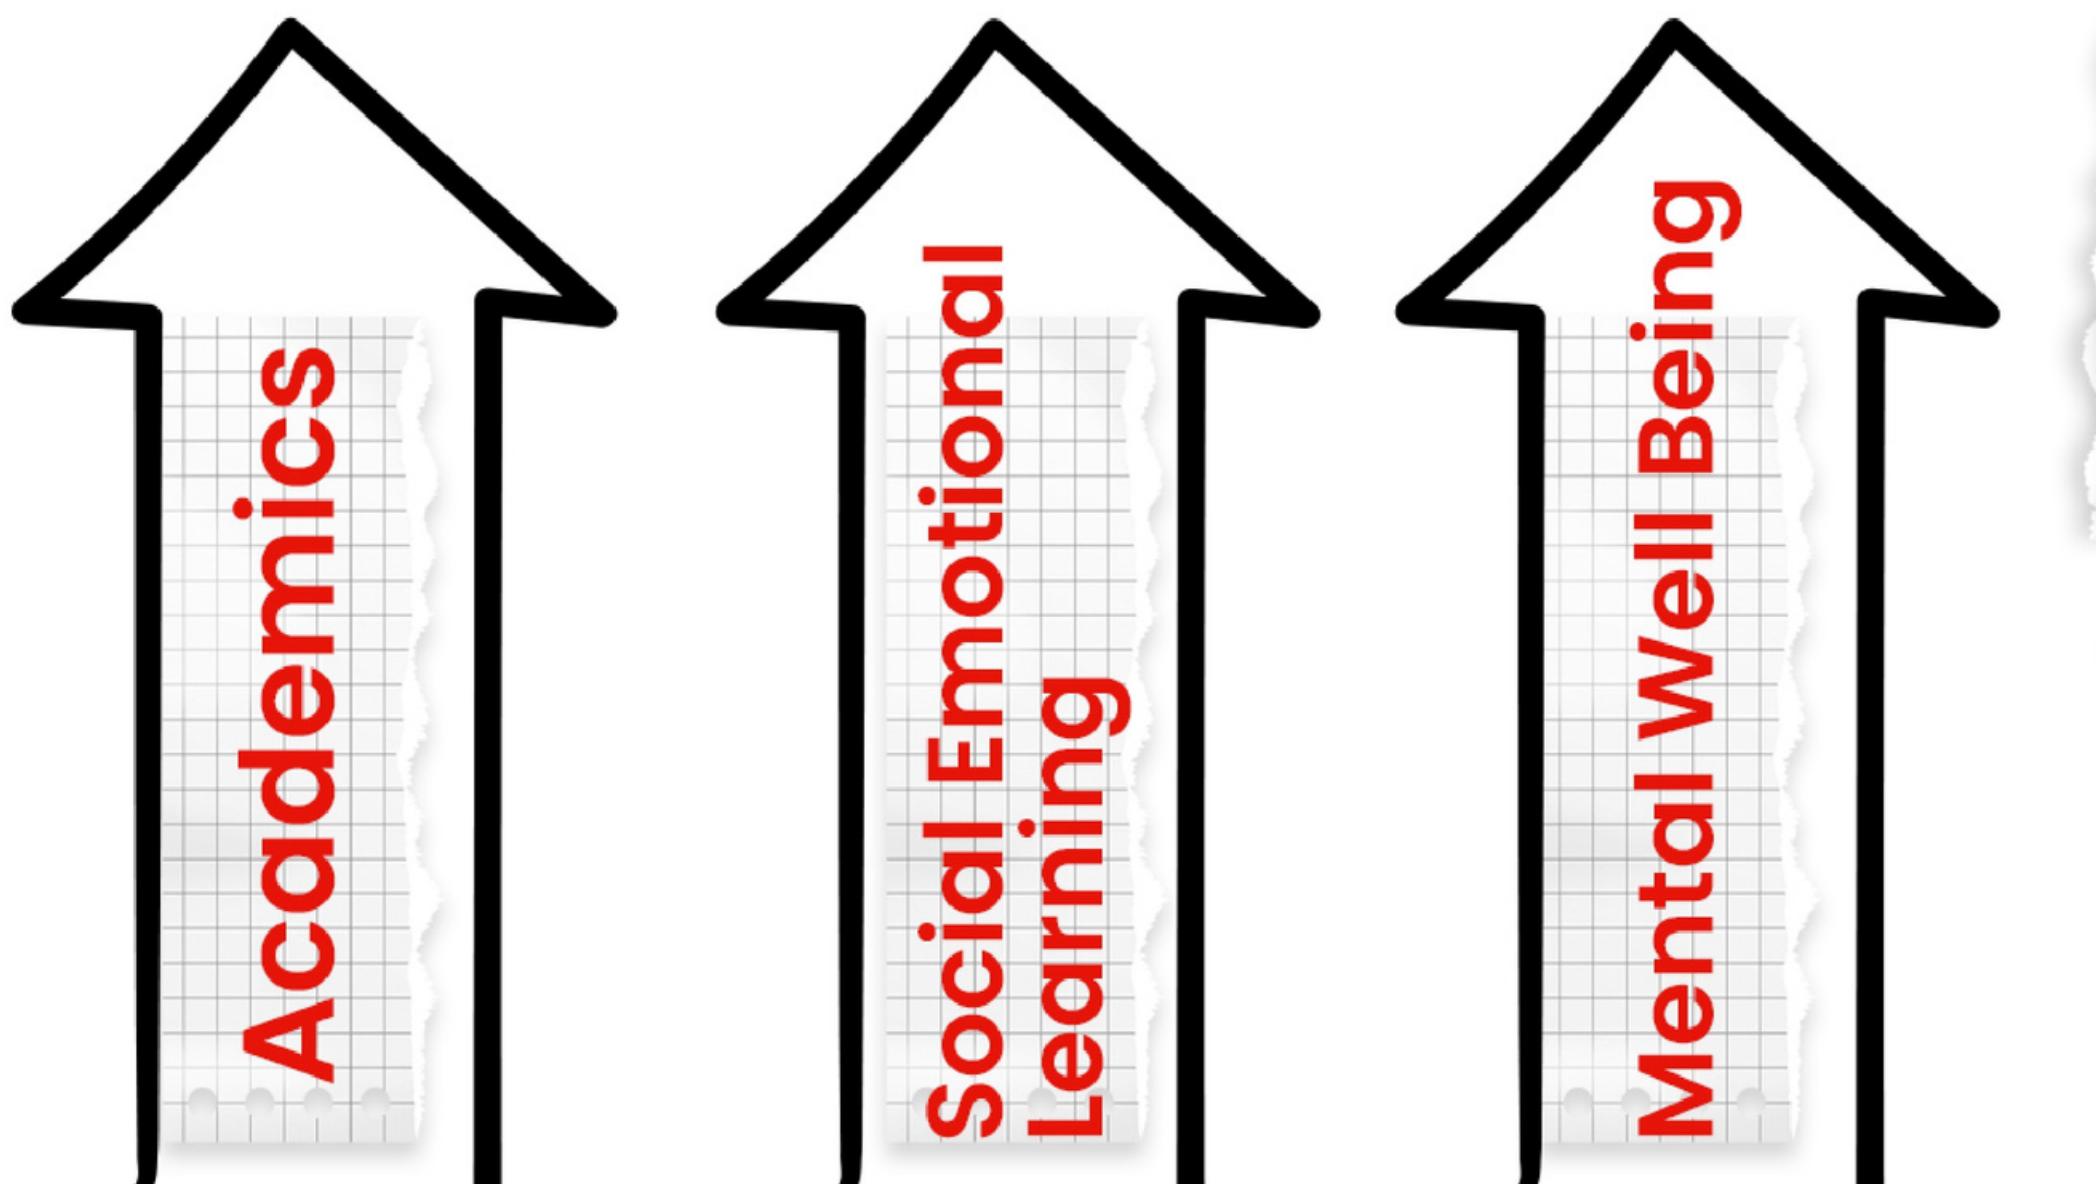

## ↳ Future-proof

*Verb*

-To build resiliency that can endure and adapt to unforeseeable situations.

Muskurahat is contributing to the growth of our children by building our three pillars of development.

## Project KEYtaab

is our flagship project that focuses on all three pillars of development. Through Keytaab we have built safe learning spaces for our children. Trained tutors work with children daily on their **academics, developing values and crucial life skills**. They help build resilience and mental wellness for every child.

Project KEYtaab is operational in Mumbai across **11 shelter homes** and **3 community centres** catering to **398 children**.

# Classroom Culture

In order to ensure effective learning for children we have developed and implemented:

## Safe Space Protocol

For the physical and emotional security of each child, our tutors are trained to help build a safe learning space, help build resilience, develop crucial life skills, values and mental wellness for each child.

## Values First

We focus on inculcating values such as respect, accountability, diligence, etc. as part of our sessions, using reiterations and positive reinforcements to help children imbibe and practice these values.

During **Project Sakshaar**  
we assessed the foundational literacy  
and numeracy skills for children in  
Mumbai, Latur & Ranchi. The aftermath  
was so serious that children in the tribal  
villages of Ranchi couldn't write  
alphabets or identify numbers.

Our project contributes towards the  
benefit of **158 children across  
5 villages in Ranchi.**

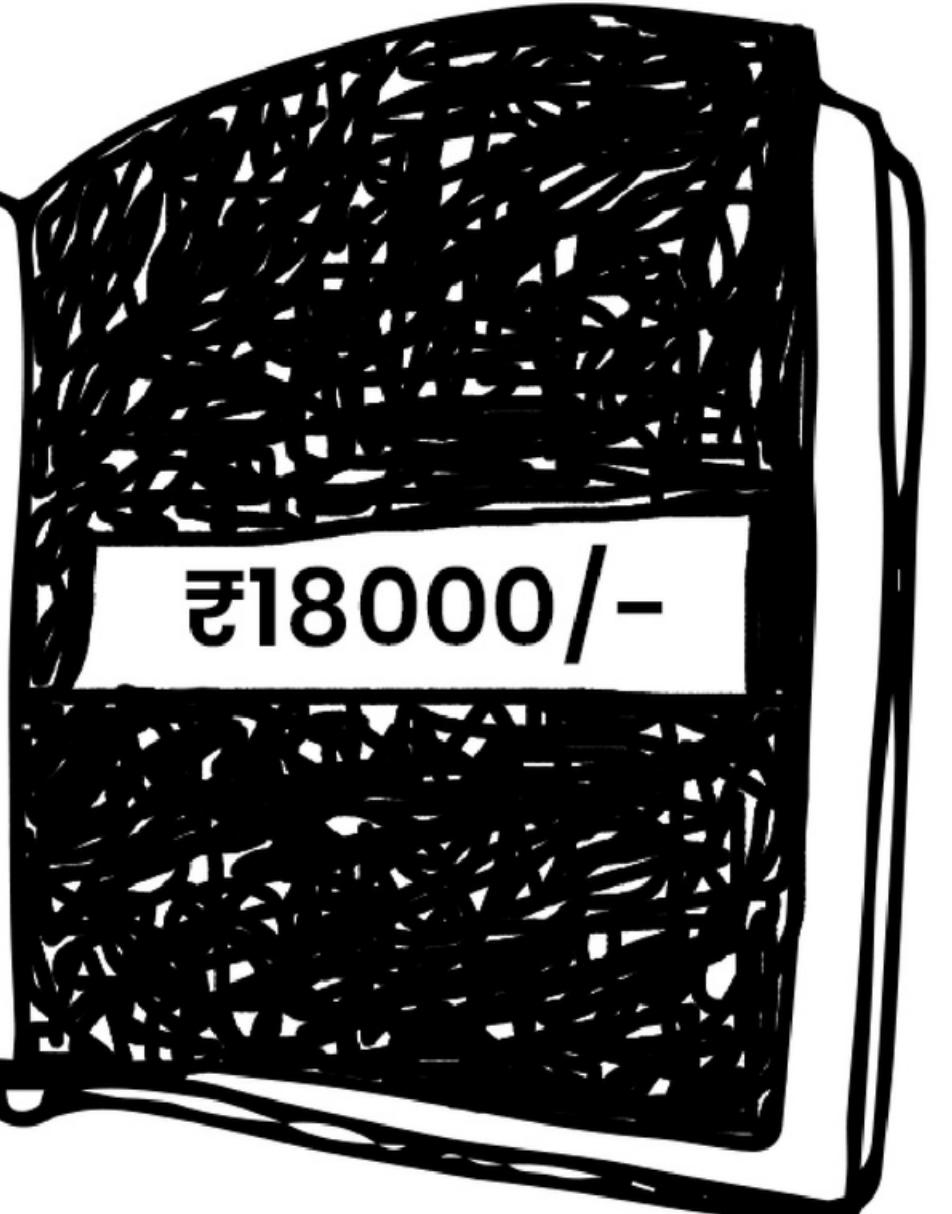

# Impact Road

We identified the need of a comprehensive monitoring and evaluation framework to help us map the trajectory of our impact. It has enabled us to track the assessment of every child, individually.

<b>Short-term outcomes</b>	<b>Year-end outcomes</b>	<b>Year on year compounding effect - impact</b>
Ensuring 90% regularity in attendance Limiting drop-out to less than 10%	Upward progress of the child's academic grade Stronger foundational literacy skills developed	Children are happy and are able to take informed decisions in their life
Increased participation of the child in the sessions Child identifies the classroom and teachers as a safe space to be themselves	Shows consistent positive behaviour on life skills and values indicators	Children are mindful of their actions and their consequences on people around them

**To fund the education of a child per year we need**

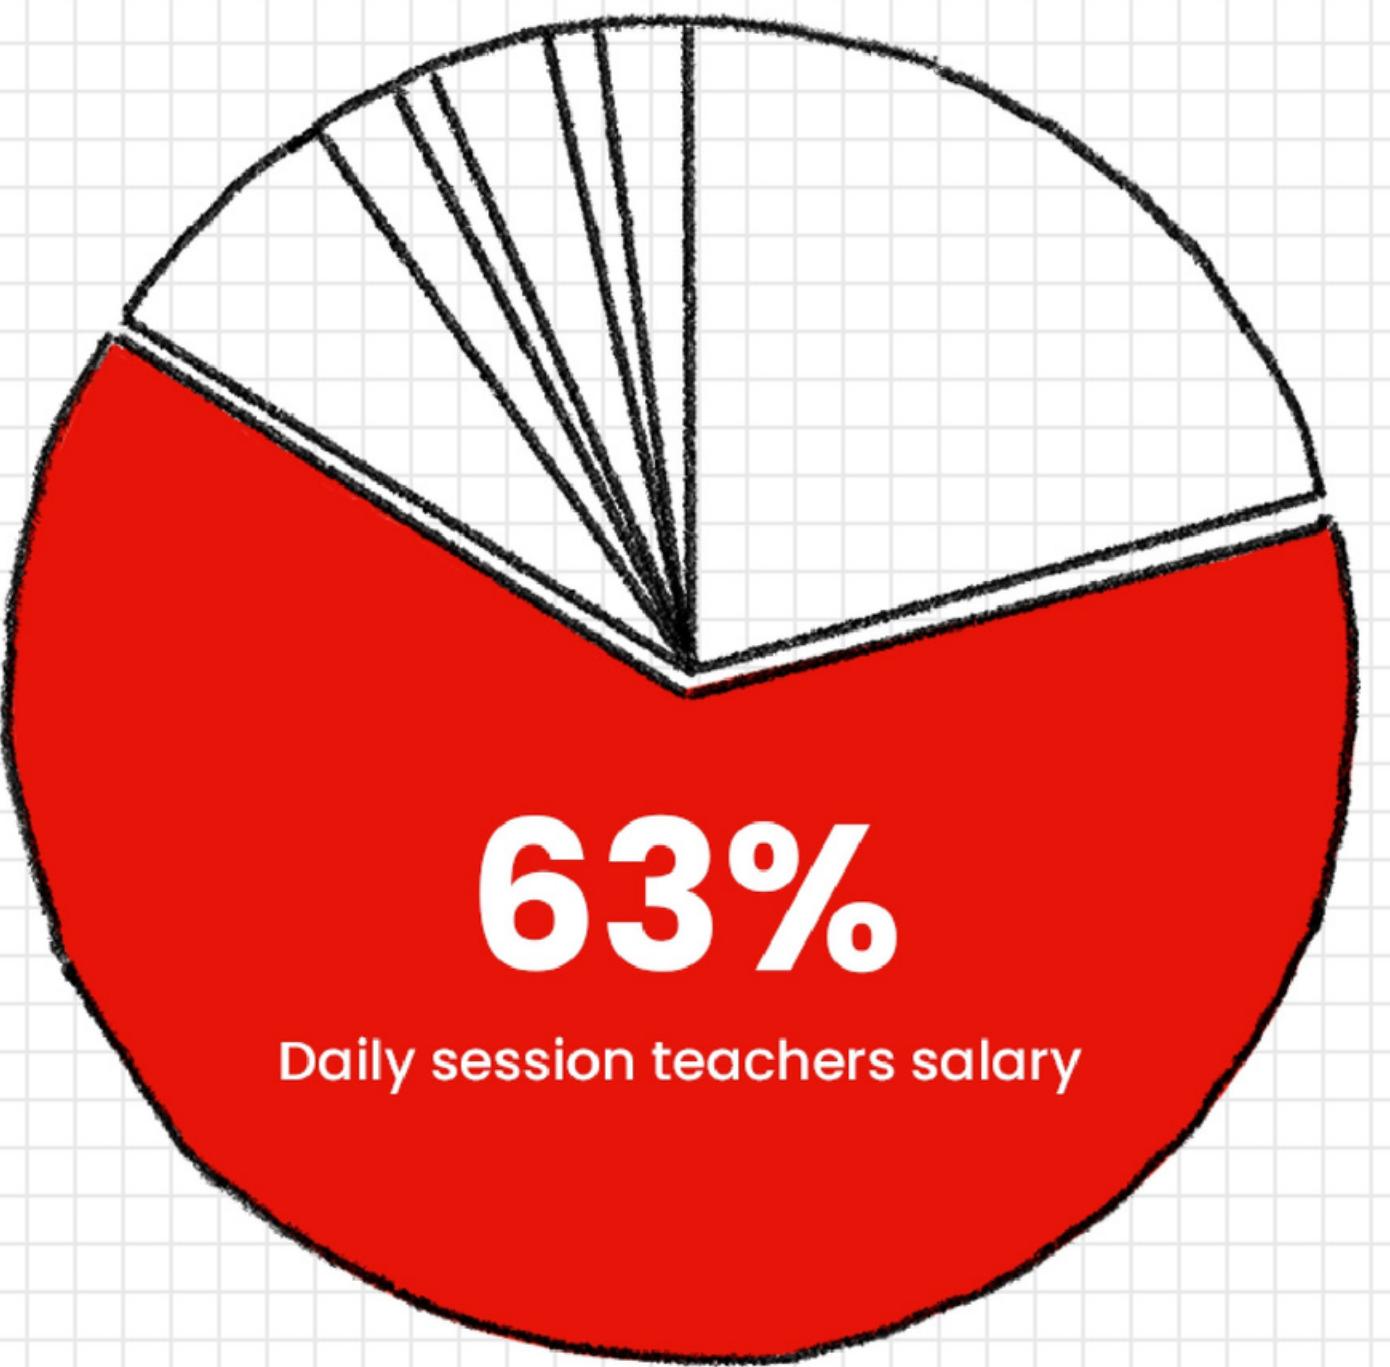

Contribute towards a child's education for **6 Months - ₹9000**

Contribute towards a child's education for **3 Months - ₹4500**

Contribute towards a child's education for **2 Months - ₹3000**

# To Serve Every Child...

- Project management Team **21%**
- Centre Rents **7%**
- Staff travel & Conveyance **2%**
- Learning materials **1%**
- Curriculum Development + Monitoring and evaluation assessment + Continuous Tutor Training **3%**
- Infrastructure & Tech **1%**
- Organisation Administration cost **2%**

**Our children need quality education to have a chance at a better future.**

Collectively, we can make it happen but we must act.

The years are not waiting for our children, so their

**Education  
Can't Wait**, either
